

GURMEET SINGH

Mobile: +91 - 95551 68631 | e-Mail: gurmeetworks@gmail.com | Ghaziabad, India

SUMMARY

- 9+ year experience of development & debugging the applications.
- Hands on experience of working with .NET, NET Core Applications viz. Web Site, Web Form, Win Form, Windows Services, WCF, SQL Server Integration Services (SSIS) and SQL Server Reporting Services (SSRS).
- Have extensive knowledge of analysis, design, development & testing of software solutions and skilled in Microsoft technologies.
- Experienced in client management as an onsite coordinator to provide production support and right information.
- Lead a team and experience of team management, planning & transitions.
- Published knowledge document on Infosys internal knowledge management portal.

EXPERIENCE

Infosys Limited: Technology Analyst (February 2015 – Till date)

Responsibilities:

- Participate in handing customers as onsite coordinator to provide right level of information to the customers and the PM and to undertake onsite specific activities of the project.
- Participate in the requirement gathering, analysis, signing off and the estimation of work product.
- Participate in detail design documentation, architecture implementation, development, artifacts review and code review.
- Prepare & perform various test plan (functional non-functional validation) and conduct reviews.
- Ensuring the availability of production application as per agreed service levels and respond to the production issues as per the agreed SLAs.
- Leading the team as onsite coordinator and planning & performing the onsite specific activities to ensure the well-being of onsite team.
- Conduct trainings and prepare transitions plan for new team.
- Participate in design, development and testing for .NET, .NET Core & SQL. Also participate in debugging and enhancement of products.
- Preparing the test plan and the test-driven data to ensure the good quality of the application.
- Suggest creative ideas, utilities, and tool to make the business easier and fast.
- Participate in migration of existing legacy application/packages/services/servers to the latest feasible technology.
- Participate in deployment activities and perform sanity testing to ensure the 100 % availability of production applications.

PROJECTS

- Manufacturing Traceability:** This application is used for the traceability of manufacturing process of the parts. Presence of the parts were captured at every stage with the help of hardware interfaces. E.g. USB and Ethernet scanners. Application is being used in the live manufacturing process of vehicle parts and to export them. SignalR is used to leverage the available ethernet scanners. Application is interfaced with multiple applications to send/receive data using FTP/SFTP.
- Defect Traceability:** Application for the traceability of the defects captured during the manufacturing process of the vehicle and to generate complex defect trending graphs and reports to ease the process of analysis and improvisation.
- Quotation Generation:** An application to generate the quotation and prices of different vehicle parts on the basis of details i.e., Material Cost and transportation cost uploaded by users. The cost generated by this application is fetched and used in multiple applications of export.
- Export Planning & Traceability:** This application is being used by export users to upload the order and to generate the shipping & planning documents to export the vehicle parts to different countries. Application generate an arrangement to fill the cases in a container efficiently and to use the manpower effectively.
- Backup Generator:** SSIS application, which downloads a data file from an ftp, process the file, loads data to SQL database and uploads same file to different ftp location. This application was used to back up data file system to relational database (MS-SQL) for backup purpose.
- Transaction Exception Reporting:** This is an SSIS application with a customized flows, which loads data from source DB2 to SQL target database. The application connects to different type of data sources and loads data based on a complex condition to perform internal operations e.g., encryption.
- Transaction Monitoring:** This application is used to monitor and manage the client stocks in bank. It was a financial domain application, which is used to manage internal transaction between the organization and client of the organization.
- Legacy System Migration:** This application was a unified platform made from multiple web applications used to monitor and manage the bank internal transactions. Transactional and managerial data were managed using SSIS packages.
- Semi-Automated Invoicing System:** This application was used for the purpose of invoicing of assets/devices. The application was responsible for generating the invoices as well as sending it out to the respective recipients.

ACADEMICS

B. Tech – Information Technology
Uttar Pradesh Technical University - Lucknow, UP
Krishna Institute of Engineering & Technology, Ghaziabad (2014)

Intermediate – Computer Science (Secondary Education)
Central Board of Secondary Education – New Delhi
Kendriya Vidyalaya, Ghaziabad (2009)

High School - Science
Board of Highschool & Intermediate Education, Lucknow
SSK Sr. Sec. School, Ghaziabad (2007)

TECHINICAL SKILLS

C# .NET MVC Entity Framework

.NET Core MS SQL SSIS SSRS

WCF Web API

AUXILIARY SKILLS

SignalR MSMQ SFTP

Socket programming (Win Services)

Windows Server Management (2003, 2012 R2)

Internet Information Service

TOOLS

Visual Studio 2010 - 2015 SVN

SQL Serve Data Tools WinSCP

SQL Server Management Studio

Team Foundation Server

ENHANCEMENTS

- Text File Repair Tool
- Server Monitoring Tool
- SQL Query Formatter
- Ethernet to USB Converter
- Bulk Data Uploader
- SSRS Deployment Tool
- Automatic Log Eraser
- Capture Screenshot
- Windows Service Manager
- Database Rollback

ACHIEVEMENTS

- Insta Award for the outstanding performance– March 2016
- AFE Award for the stunning poetry performance – March 2016
- Insta Award for the outstanding performance– May 2018
- Special Bonus for the outstanding performance, support, and dedication – May 2018
- Pune DC Excellence Award for the Social Consciousness– Sep 2017
- Pune DC Excellence Award for the outstanding contribution to Infosys Pune DC – Dec 2018
- Higher Performance Bonus for the outstanding performance, support, and dedication – Aug 2019
- Higher Performance Bonus for the outstanding performance, support, and dedication – Aug 2020
- Zenith Awards for the outstanding dedication and effort – September 2020
- Most Valuable Player for exceptional performance – October 2020

SUPPLEMENTARY WORKS

- Published knowledge document on Infosys knowledge management portal.
- Completed Infosys certification in C#, .NET, SSIS, Secure Web, Web Fundamental.
- Microsoft Certified : Azure Fundamentals
- Business English Level 6 from Learnship GlobalEnglish
- HMM Certification in Negotiating at corporate level.
- At Infosys Pune, participated in CSR activities: Food Drive/Notebook Drive/Independence Day/Teaching & Learning/Poetry & Comedy events
- At Infosys Pune, member of:
 - Pratibimb – Managing & arranging the production requirement of theatric arts.
 - Kavyanjali – Organizing & performing poetic events inside and outside the campus on behalf of Infosys.
 - BDC Group – Organizing & managing blood donation camps in Infosys campus quarterly.
 - CSR Group – Organizing and managing the CSR activities inside and outside the campus.
- At Infosys Noida, member of:
 - Kavyanjali – Organizing & performing poetic events inside and outside the campus on behalf of Infosys.
 - CSR Group – Organizing and managing the CSR activities inside and outside the campus.
